Combine the first 7 ingredients in a food processor fitted with a metal blade and pulse until the mixture is the consistency of rough paste. Rub both sides of each filet with paste; place in a glass dish, cover. Refrigerate overnight.

To Grill:

Preheat grill to medium hot. Grill the steaks 5 inches above a medium hot fire for 3-6 minutes on each side depending on thickness of filets. The outside of the steaks will be brown and crusty. (Do not allow to get too dark.) Remove from grill and let rest for 5 minutes before serving.

Note: If cooking longer than the suggested time, reduce heat of fire.
