

Words Worth Eating

HOT FUDGE CAKE

“Makes its own fudge sauce as it bakes!”

2 ounces unsweetened baking
chocolate

1 stick butter

1½ cups sugar

2 cups flour

4 teaspoons baking powder

¼ teaspoon salt

1 cup milk

1 teaspoon vanilla

TOPPING:

1 cup sugar

1 cup dark brown sugar

6 tablespoons cocoa

1½ cups cold black coffee

½ gallon vanilla ice cream

Preheat oven to 350. Melt chocolate and butter over low heat and set aside. Place sugar in a large mixing bowl. Measure flour and then sift with baking powder and salt. Combine flour mixture with sugar; add chocolate mixture. Slowly add milk and vanilla. Pour batter into a lightly greased 9 x 13 baking pan. Combine the first four topping ingredients and spread over the batter. **DO NOT MIX THE BATTER AND TOPPING TOGETHER!** Bake approximately 45 minutes or until the cake is done. Allow to cool 15 minutes before serving. Spoon into bowls and top with vanilla ice cream. Serves 12-14.

Note: When testing for doneness of the cake, press cake lightly with finger. If your finger does not leave an imprint, the cake is done. Do not test by sticking something through to the bottom of the dish since the sauce is on the bottom.

“Best warm, but it’s also good when cold!”
