PEACH ICE CREAM MOLD

"Made with fresh peaches!"

2 pounds extra-ripe
peaches, peeled and chopped
1/4 cup sugar
1/2 gallon vanilla ice cream
plastic wrap

GARNISH:

1 8-10-ounce jar Melba Sauce

2-3 ripe peaches,
peeled and sliced
1 cup fresh raspberries
(optional)

Place peaches in a large bowl; stir in sugar. Allow to stand at room temperature for 30 minutes; mash peaches. Line a 10-cup mold or bowl with plastic wrap; let plastic wrap hang over sides of mold or bowl. Allow ice cream to soften and mix with peaches. Place ice cream mixture in mold; cover with plastic wrap. Freeze overnight. When ready to serve, invert onto serving plate. Peel off plastic wrap and drizzle with Melba sauce and garnish with sliced peaches. Cut into wedges and serve. Serves 10-12.

Note: For ease in removing, dampen towel with hot water and place over mold for a few seconds after inverting on serving plate.

“Quick, easy and spectacular!”
